

**REMARKS**

In the Official Action, the Examiner required an election of one of the following groups of claims:

Group I: Claims 1-6 and 10-17, and 20-22 drawn to selecting via a web page a plurality of receipt programs associated with an intelligent appliance wherein the plurality of recipe programs are a subset of recipe programs chosen from a group of recipe program available to be chosen for the intelligent appliance; storing the selection of the plurality of recipe programs in a user profile at a location remote from the intelligent appliance; downloading at least one of the plurality of recipe programs to the intelligent appliance; receiving a message from the intelligent appliance requesting a new recipe program, the message being sent from the intelligent appliance without user intervention; and upon finding the new recipe program in a database, transmitting the new recipe to the intelligent appliance, classified in class 700, subclass 90.

*Claims 7 and 9, drawn to a user identifier element that identifies a record in a database an appliance identifier element linked to the user identifier element that identifies an intelligent appliance; a plurality of recipe program elements linked to the appliance identifier element; and un unique product code element associated with at least one of the plurality of recipe program elements, classified in class 707, subclass 1.*

Group II: Claim 18, drawn to downloading the plurality of recipe programs to a memory in an intelligent appliance from the user profile; determining whether the code input

by the code input device is associated with any one of the plurality of recipe programs stored in the memory in the intelligent appliance; transmitting a request for a recipe program if the input code from the code input device is not associated with any one of the plurality of recipe programs; and receiving, at the intelligent appliance, a new recipe program associated with the code input by the code input device, classified in class 700, subclass 11.

Group III: Claim 19, drawn to storing the plurality of recipe programs in a user profile in a location remote from an intelligent appliance; downloading at least one of the plurality of recipe programs to the intelligent appliance; receiving a message from the intelligent appliance requesting a new recipe program; if the new recipe program is found in a database, transmitting the new recipe to the intelligent appliance; and if the new recipe program is not found in a database, updating the user profile with a continuing request for the new recipe program, classified in class 707, subclass 3.

In response to the Examiner's restriction requirement, Applicant elects to prosecute the claims of Group I. Accordingly, Claim 18 in Group II and Claim 19 in Group III have been withdrawn.

Respectfully submitted,

Dated: November 14, 2006
